

This versatile hand pump can be used with a wide variety of equipment where motor driven hydraulic power is not available or is undesirable.

It is ideally suited to manually operated tip trailers (6' x 4' and over) and has many uses in the transport and materials handling industries. Some of these include truck cab tilting, car transporter ramps, conveyor belt tensioning, light cranes and boat keel lifters.

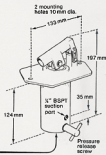

Its smooth operation provides sure and quick cylinder pressure with a minimum of effort. Available with or without attached reservoir.

WITH RESERVOIR

BH No.	A
3201	233mm
3201/180	457mm

WITHOUT RESERVOIR

Pump Body
60mm Dia.

SPECIFICATIONS

Part Number	BH3201	BH3201/180	BH3277
Reservoir capacity	1.5 litres / 60 in ³	3.0 litres / 180 in ³	N/A Pump Only
Nominal Pressure	13.8MPa / 2000 psi		
Input Force	245N / 55 lbf		
Plunger Diameter	20.6mm / 0.81"		
Displacement per cycle	22.3cm ³ / 1.36 in ³		
Maximum lever travel	50 degrees		
Handle length	508mm / 20"		

Note! For all installations the pump must be mounted vertically
