Front End loader Hydraulic cylinders Series FE2

BAKER HYDRAULICS FE2 front end loader cylinders are an update of the popular and successful FE series.

The new FE2 series feature:

- Improved design
- Externally threaded gland nut for easy and more convenient cylinder servicing.
- Hard chrome plated piston rod.
- Durable stress-ribs on bore.
- In final piston seal for greater stability and reliability under tough working conditions.
- Pressure tested to 3000 psi.
- Porting to the rear of cylinder.
- Proven long life performance for all FE loaders and similar applications.

Made in Australia
